WESTERN SYDNEY INTERNATIONAL (NANCY-BIRD WALTON) AIRPORT

1. INTRODUCTION

- 1.1 This AIC cancels and replaces AIC H43/23 with changes to para 2 and Appendix 1.
- 1.2 This AIC provides information for pilots and other airspace users regarding the development of Sydney's second International Airport at Badgerys Creek (335300S 1504246E), approximately 40 kilometres west of the Sydney CBD.

2. OPERATIONAL INFORMATION

- 2.1 RWY 05/23 is expected to be operational in late 2026. Until that time it is not a certified aerodrome. To highlight that the facility is not available for aircraft operations, WSACo (Western Sydney Airport Corporation) has elected to install the following visual aids along the length of the proposed runway.
 - 2.1.1 Thirteen (13) white unserviceability markings (see Appendix A).
 - 2.2 The above mentioned visual aids are based on guidance from *paras 8.106 (8) and 9.129 of the Part 139 (Aerodromes) Manual of Standards 2019* and may be varied due to construction requirements.
 - 2.3 As part of the certification process, WSACo may be required to remove the unserviceability markings. Should this occur, an Area NOTAM will be raised to provide advice to Airspace users.

3. CANCELLATION

- 3.1 This AIC will be cancelled when RWY 05/23 enters service in late 2026.

4. DISTRIBUTION

- 4.1 Airservices Australia website only.

Appendix

1. Unserviceability Markings
