

Interim MATS Amendment

IMA V77_03

Title	MATS Version 77 Printing Errors		
Valid from	2609090700	Valid to	2611251600
CRC	54422		
Replaces	Nil		
Background	An error during the printing process for the hard copies of MATS Version 77 has caused a number of details throughout Part 10 to be omitted. Note: This affects the printed hard copies only, it does not affect electronic versions. Part 10 relates to separation standards and the printing error has affected several diagrams and omitted some clause content. As hard copies are distributed to all ATS units, this creates a potentially hazardous situation whereby important information relating to separation standards is not present within the manual.		

What to do with this IMA	• Using a highlighter, colour the clause number of every clause affected by this IMA. • Where a new clause is inserted draw a line across the page to show readers the insertion point. • When a clause is inserted or deleted, renumber subsequent clauses. • Put this IMA into the front cover sleeve. • Sign the IMA Check-off Table on the sleeve. • If this IMA is not effective immediately, the MATS Electronic Edition will be pending under the 'Other Documents' title on the MATS webpage.
Clause number	Action
All clauses, Part 10	Part 10 should either be: • removed from MATS Version 77 or • each page diagonally struck out with a highlighter to indicate that the information is no longer available to controllers. Electronic version of MATS Chapter 10 remains correct and available for use. A corrected Part 10 will be dispatched from the printing service provider and is to accompany the parent document.
